Trainer
Industry Professionals

Career Services
By Croma Campus

Our course content has been specifically designed to turn you into a skilled professional in this industry. As a part of your certification training, you will receive enough study material and recorded video sessions that will help you cover all the latest trends and features in this course. The training session will comprise important sections, features, advantages, and scope of the technology in the coming years. Moreover, our qualified trainers will help you imbibe all the required skills, and information in a much better manner to help you in you becoming an expert in this technology. Post the completion of your course, you will receive a training certificate recognized world-wide.

What Make Us Trick

Career-oriented Sessions
Attend 25+ career-oriented sessions by industry mentors and prepare your career trajectory

Profile Building
Craft a Cloud Computing resume and LinkedIn profile and make an impression on top employers

Mock Interview Preparation
Prepare with mock interviews including most asked questions by top employers

1:1 Mentoring Sessions
Get 1:1 guidance at every step in your career transition to Cloud Computing

Dedicated Job Portal Access
Get exclusive access to 200 job postings per month on Intellipaat's job portal

Minimum 3 guaranteed interviews
Get job interviews with 400+ hiring partners including promising startups and top MNCs

Program FEATURES

Key Highlights

- Instructor - Led Training
- Self- paced Videos
- Project & Exercises
- Job Assistance
- Flexible Schedule
- Life Time Exam Portal Access
- Mentor Support
- Guaranteed Interviews
- 1 - 1 with industry mentors
- Training Certification

Who Should Enroll in this Program?

Any technical/non technical degree or equivalents such as B.tech, M.tech, a degree in engineering, bachelor/master's in computer science, and basic programming knowledge.

This program caters to a wide audience, from those who are hoping to enter the industry

- Fresh graduates who are intent on taking the plunge into the job market
- Developers who are working in one of the functional roles of front-end or back
- Development and want to shift to full stack development
- Test engineers, system engineers, and others who want to make a career shift to

NETWORKING FUNDAMENTALS

Module 1 : Introduction to Networking

- What is Networking?
- Importance of Networks in the Digital Age
- Types of Networks: LAN, WAN, MAN
- Network Components: Nodes, Links, Switches, Routers

Module 2 : Network Models and Protocols

- OSI Model: Layers and Functions
- TCP/IP Protocol Suite
- Comparing OSI and TCP/IP Models
- IP Addressing and Sub netting Concepts

Module 3 : Network Devices and Topologies

- Network Devices: Hubs, Switches, Routers, Modems
- Network Topologies: Bus, Star, Ring, Mesh
- Understanding VLANs and Trucking

Module 4 : Ethernet and Data Link Layer

- Ethernet Standards and Frame Structure
- MAC Addresses and ARP
- VLANs and VLAN Tagging
- Ethernet Switching and Broadcast Domains

Module 5 : Network Layer and Routing

- IP Addressing: IPv4 vs. IPv6
- Sub netting and CIDR
- Routing Concepts and Algorithms
- Dynamic and Static Routing

Module 6 : IP Address Management

- DHCP: Dynamic Host Configuration Protocol
- DNS: Domain Name System
- NAT: Network Address Translation
- PAT: Port Address Translation

Module 7 : Transport Layer and TCP/UDP

- TCP vs. UDP: Comparison and Use Cases
- TCP Three-Way Handshake and Connection Termination
- Port Numbers and Sockets

Module 8 : Network Security and Firewalls

- Introduction to Network Security
- Firewalls: Types and Functionality
- Intrusion Detection and Prevention Systems (IDS/IPS)

Module 9 : Wireless Networking

- Wireless Standards: 802.11a/b/g/n/ac/ax
- Wireless Security: WEP, WPA, WPA2, WPA3
- Wi-Fi Channels and Interference

Module 10 : Network Troubleshooting and Monitoring

- Network Troubleshooting Methodology
- Using Network Diagnostic Tools (ping, tracer, nslookup)
- Network Monitoring Tools and SNMP

Module 11 : Network Virtualization

- Introduction to Virtualization
- Virtual LANs (VLANs)
- Virtual Private Networks (VPNs)
- Software-Defined Networking (SDN)

Module 12 : Cloud Networking and IOT

- Cloud Computing Basics
- Cloud Networking Concepts
- Internet of Things (IOT) and Its Impact on Networking

Module 13 : Network Design and Planning

- Network Design Considerations
- Scalability and Redundancy

- Disaster Recovery and Business Continuity

Module 14 : IPv6 and Future of Networking

- IPv6 Addressing and Transition
- Benefits and Challenges of IPv6
- Future Trends in Networking

Module 15 : Hands-On Labs and Practical Exercises

- Configuring IP Addresses and Sub netting
- Setting Up VLANs and Trucking
- Configuring DHCP and DNS
- Troubleshooting Network Issues

Exploring the Power of Kali Linux : A Comprehensive Overview

Kali Linux, a versatile and powerful penetration testing and ethical hacking platform, has become an essential tool for cybersecurity professionals, ethical hackers, and enthusiasts alike. Born from the roots of BackTrack Linux, Kali has evolved into a robust platform that offers a wide array of tools and resources for various security testing and research purposes.

- ### Introduction to Kali Linux :

Kali Linux, developed by Offensive Security, is a Debian-based Linux distribution designed specifically for penetration testing, digital forensics, and security auditing. It provides an all-in-one solution for various security-related tasks.

- ### Key Features and Benefits :

  - **Vast Toolset :** Kali Linux comes preloaded with over 600 security tools, including information gathering, vulnerability analysis, wireless attacks, web application testing, and more.
  - **Customizability :** Users can customize Kali to suit their needs, adding or removing tools based on their specific requirements.
  - **Accessibility :** Kali is available for free download and offers both 32-bit and 64-bit versions.
  - **Community and Support :** A large and active community provides tutorials, guides, and support for Kali users.
  - **Regular Updates :** Kali Linux is regularly updated with new tools, bug fixes, and enhancements

- ### Common Use Cases :

  - **Penetration Testing :** Kali is widely used for simulating cyber attacks to identify vulnerabilities in networks, applications, and systems.
  - **Digital Forensics:** Its toolkit is invaluable for recovering data, investigating incidents, and analyzing digital evidence.
  - **Security Research :** Security professionals use Kali to explore vulnerabilities and research new exploits.
  - **Ethical Hacking :** Ethical hackers use Kali to identify security flaws and help organizations strengthen their defenses.

- ## Notable Tools in Kali Linux :

  - **Metasploit Framework :** A powerful tool for developing, testing, and executing exploit code against a remote target
  - **Nmap :** A network scanning tool used for network discovery and vulnerability detection.
  - **Wireshark :** A network protocol analyzer for monitoring and analyzing network traffic. web application testing, and more.
  - **Burp Suite :** A web vulnerability scanner and proxy tool for web application security testing.
  - **Aircrack-ng :** A suite of tools for auditing wireless networks and cracking WEP/WPA keys.

- ## Getting Started :

  - **Installation :** Download the Kali Linux ISO from the official website and install it on a virtual machine or physical hardware.
  - **Basic Usage :** Familiarize yourself with the Linux terminal, command structure, and basic commands.
  - **Updating and Upgrading :** Keep your Kali Linux system up to date by regularly running the apt update and apt upgrade commands.

- ## Learning Resources :

  - **Kali Linux Documentation :** The official documentation provides detailed guides, tutorials, and how-to articles.
  - **Online Communities :** Engage with the Kali Linux community on forums, Reddit, and social media platforms for advice and assistance.
  - **YouTube Tutorials :** Many cybersecurity experts and enthusiasts create video tutorials on using Kali Linux and its tools.

- ## Ethical Considerations :

  While Kali Linux is an essential tool for security professionals, it's important to use it responsibly and ethically. Always ensure you have proper authorization to conduct security testing on systems and networks.

  In conclusion, Kali Linux stands as a powerful companion for cybersecurity practitioners, enabling them to assess and improve the security posture of systems and networks. By harnessing its extensive toolkit and resources, individuals can deepen their understanding of cybersecurity and contribute to making the digital world a safer place

ETHICAL HACKER CEHV12

Module 1 : Introduction to Ethical Hacking

- Understanding Ethical Hacking
- Hacker Types and Phases
- Legal and Ethical Aspects

Module 2 : Networking Foundations

- Networking Basics and Concepts
- OSI Model and TCP/IP Protocol Suite
- IP Addressing and Subnetting
- Network Devices and Topologies

Module 3 : Kali Linux Essentials

- Introduction to Kali Linux
- Kali Linux Installation and Configuration
- Linux Command Line Basics
- Package Management

Module 4 : Footprinting and Reconnaissance

- Information Gathering Techniques
- Passive and Active Reconnaissance
- Google Hacking and Social Engineering

Module 5 : Scanning Networks

- Network Scanning Concepts
- Port Scanning Techniques (TCP, UDP)
- Vulnerability Scanning with Nmap

Module 6 : Enumeration and System Hacking

- Enumerating Network Resources
- Service Enumeration and Banner Grabbing
- Gaining Access: Password Cracking, Brute Force, and Exploitation

Module 7 : Malware Threats

- Introduction to Malware

- Malware Analysis and Detection
- Trojan, Virus, Worm, and Ransomware

Module 8 : Sniffing and Social Engineering

- Packet Sniffing Techniques
- ARP Spoofing and MITM Attacks
- Phishing, Spear Phishing, and Pretexting

Module 9 : Web Application Hacking

- Web Application Architecture
- OWASP Top Ten Vulnerabilities
- Cross-Site Scripting (XSS), SQL Injection, and CSRF Attacks

Module 10 : Wireless Network Hacking

- Wireless Network Concepts
- WEP, WPA/WPA2 Cracking
- Wireless Attacks and Defense Mechanisms

Module 11 : Cryptography

- Cryptography Fundamentals
- Symmetric and Asymmetric Encryption
- Public Key Infrastructure (PKI) and Certificates

Module 12 : Penetration Testing Methodologies

- Penetration Testing Overview
- Penetration Testing Lifecycle
- Reporting and Documentation

Module 13 : Advanced Tools and Techniques

- Metasploit Framework
- Exploit Development
- Reverse Engineering and Debugging

Module 14 : Evading IDS, Firewalls, and Honeypots

- Intrusion Detection and Prevention Systems
- Firewall Evasion Techniques
- Honeypots and Honey tokens

Module 15 : Cloud and IoT Security

- Cloud Computing Concepts
- Cloud Security Risks and Mitigation
- Internet of Things (IoT) Security Challenges

Module 16 : Mobile Hacking and Security

- Mobile Platform Vulnerabilities
- Mobile Application Security Testing
- Securing Mobile Devices

Module 17 : Post-Exploitation and Reporting

- Maintaining Access and Covering Tracks
- Post-Exploitation Techniques
- Writing Effective Penetration Test Reports

Module 18 : Legal and Ethical Considerations

- Laws and Regulations in Ethical Hacking
- Professional Code of Ethics
- Reporting Vulnerabilities Responsibly

Module 19 : Career and Certification Path

- CEH Certification Overview
- Continuing Education and Skill Development
- Building a Career in Ethical Hacking

Module 20 : Hands-On Labs and Practical Exercises

- Practical Application of Concepts
- Simulation of Real-World Scenarios
- Kali Linux Tools in Action

AWS

- Module 1 : Introducation to Cloud Computing
- Module 2 : Amzazon EC2 and Amazon EBS
- Module 3 : Amazon Storage Services S3 (Simple Storage Services)
- Module 4 : Cloud Watch & SNS
- Module 5 : Scaling and Load Distribution in AWS
- Module 6 : AWS VPC
- Module 7 : Identity and Access Management Techniques (IAM)
- Module 8 : Amazon Relational Database Service (RDS)
- Module 9 : Multiple AWS Services and Managing the Resources' Lifecycle
- Module 10 : AWS Architecture and Design
- Module 11 : Migrating to Cloud
- Module 12 : Router S3 DNS
- Module 13 : Cloud Formation
- Module 14 : Elastic Beanstalk
- Module 15 : EFS / NFS (hands-on practice)
- Module 16 : Hands-on practice on various topics

PYTHON

- Module 1 : Python Training Curriculum
- Module 2 : Introduction To Python
- Module 3 : Python Keyword and Identifiers
- Module 4 : Introduction To Variables
- Module 5 : Python Data Type
- Module 6 : Control Structure & Flow
- Module 7 : Python Function, Modules and Packages
- Module 8 : List
- Module 9 : Tuple
- Module 10 : Dictionary
- Module 11 : Sets
- Module 12 : Strings
- Module 13 : Python Exception Handling
- Module 14 : Python File Handling
- Module 15 : Contacting user Through Emails Using Python
- Module 16 : Complete Understanding of OS Module of Python

e-Learning through LMS

Learning Management System

Our LMS (LearnPitch) is for the administration, documentation, tracking, reporting, automation, and delivery of educational courses, training programs, or learning and development programs.

Our LMS has been designed to identify training and learning gaps, using analytical data and reporting to keep you up with the class activities.

Key Features Learning Management System

- Live Sessions with Class recordings
- Get study material with Assignments.
- Track your curriculum covered.
- Track your class wise attendance
- Share your feedback for Trainer & Training
- Get your Training Certificate from LMS

Training Certification

Earn Your Certificate

Your certificate and skills are vital to the extent of jump-starting your career and giving you a chance to compete in a global space.

Croma Campus! Reviews

"The most rewarding part of my experience has been achieving a prestigious certification in the subject that I love. Moreover, the training offered out by the specialists are of world-class and prepares out the students for corporate world. For me Croma Campus means a lot."

"By The Students For The Students"

Your Success Is Our Story

Bharat

"I am fully satisfied with the excellent training services received by the expert staff at Croma Campus. I want to thank Croma Campus for providing me with the most innovative and affordable training services for learning all the software testing procedures and guidelines."

Ankit

"It was a lifetime experience for me to get trained by IT Experts of Croma Campus. What I liked most about the training was the consistent high-quality education, which was friendly and co-active. The placement department was also proactive, they keep me updated regarding new job opportunities and provide the grooming session to crack the interview. At last, I would like to thank all faculty members of Croma Campus for their immense help and support."

Umesh

"Without any second thought, I will give Croma Campus 10/10. Their placement department is highly proactive. I remember they started scheduling interviews for me from the very next day when I told them my course has been completed. These people are doing a phenomenal job and I highly recommend Croma Campus to everyone."

Shams Khan

"Croma Campus is doing a phenomenal job in the IT training industry. The reason why I decided to join their training program was that they provide quality training at very a nominal price. Plus, the online training mode was also a factor due to which I decided to join the training program of Croma Campus as I didn't want to attend physical classes."

Meet Our Team

Sales Team

Our Sales team is highly passionate, emphatic, positive attitude, great listening skills, ability to deliver quick solutions, and they are multitasker too. Our team always remains up-to-date about all the latest technologies and market trends. With effective communication skills, they always work to deliver the right information to customers when it is needed.

Product Team

Our product team is highly functional and collaborative working together to achieve the common outcome of designing exceptional digital experiences. Each of our members is a contributor to help us achieve success in long-run. Sitting at the high-end of technology and innovation, team helps to deliver high-end customer experiences and always comes out with a big idea as a game-changing plan.

Marketing Team

Our Marketing team works as gladiators and helps us to achieve business success in all possible ways. They are included in almost everything either it is building a brand, creating brand awareness, promoting products or services, delivering trailblazing customer experiences or increasing engagement at public forums. They are the true backbone of the Company.

Content Team

Our content team is responsible for ideation, creation, optimization, and distribution of content throughout the company. The team always starts its work with a strategy, how to create high-quality contents, and how to promote or share the content. Our in-house content team help us to produce all types of contents either they are educational content pieces, marketing content, SEO content, or any other forms too.

Customer Access Team

This is the team that has actually been taken up us from reactive state to a pro-active state. The team utilizes high-valued solutions to satisfy customers in all possible ways. It is truly said that no company can succeed if your customers are not satisfied. And our customer success team is dedicatedly working to keep all the customers satisfied and we always consider our customer feedback on priority.

HR Team

Our HR team is committed to provide high-end solutions to employees as they require. Our HR team has the right skills and knowledge to make sure that the HR department can always be legally and strategically successful. They know how to keep employees motivated all the time with the best HR policies and fun activities too from time to time.

Glimpse Of Our Office

Look Who We are

Our office's infrastructure comprises all the necessary software and network resources that are required to deliver IT & Design, Human Resources, Digital Marketing, and training services.

We are well-equipped with bright designed work bays for employees and managers having separate cabins with spacious cafeteria and training classrooms.

About Croma Campus

"Our Mission is to Build Nation through Education & Beyond Limitation."

Croma Campus Training & Development Private Limited is an education platform providing rigorous industry-relevant programs designed and delivered in collaboration with world-class faculty, industry & Infrastructure. In the past 12 years we have trained 18000+ candidates and out of which we are able to place 12000+ professionals in various industries successfully.
